MASTER OF SCIENCE IN KINESIOLOGY

Students should consult the General Regulations section of the Graduate Catalog for additional information regarding Graduate School admission requirements, transfer credit, and other critical policies and procedures.

The Master of Science (M.S.) degree in Kinesiology offers advance study in the science of human physical activity, particularly as movement, exercise, and sport applied to health promotion and disease prevention. The mission of the Kinesiology program is to advance the discovery, development, interpretation, dissemination, and application of knowledge that relates the study of human movement and physical activity to human well-being. As members of the American Kinesiology Association (AKA), Society of Physical Educators (SHAPE), American College of Sports Medicine (ACSM), and the North American Society for Psychology of Sport and Physical Activity (NASPSPA). The Faculty at Troy University are committed to the process of learning in order to better prepare students entering the various fields of human movement.

This degree is ideal for:

Students who wish to continue their education in a doctoral program.

Students who wish to continue their education in a professional school which includes the p education for: sch*their p who wish to

MASTER OF SOCIAL WORK

Students should consult the General Regulations section of the Graduate Catalog for additional information regarding Graduate School admission requirements, transfer credit, and other critical policies and procedures

The Troy University an

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations and communities.

Program Eligibility

All students must be admitted to Troy University Graduate School. There is not a conditional admission based on grade point average. All students holding an earned baccalaureate degree from a college or university accredited by a recognized regional accrediting association are eligible for application to the Two Year (60) hour program. Students must have a 2.5 (4.0 scale) or a 3.0 grade point average on the last 30 semester hours taken.

Students holding a Bachelor's degree in Social Work (BSW) from a CSWE accredited program and have a 3.0 grade point average in the last 30 semester hours of Social Work course work are eligible to apply for Advanced Standing. Advanced Standing applicants may receive a MSW upon successful completion of 30 semester hours of Concentration Curriculum. The Director of the MSW Program is responsible for determining academic eligibility for Advanced Standing Placement. The Director is also responsible for answering questions related to academic credit applied to the degree program in adherence to accreditation and policy standards.

In addition to the grade point average requirements, students who can provide proof of an active LBSW or 5 years of verifiable social service employment will have the MAT/GRE waived. All other students must take the GRE or MAT. The GRE acceptable score is 850 combined (old) or 290 combined (new). The MAT acceptable score is 385. There is a conditional admission only because of a low test score. Students admitted conditionally only because of a low test score will be granted unconditional admission after the completion of nine (9) semester hours provided they have maintained a 3.0 grade point average on all graduate work attempted. There is not a requirement to retake the test once the academic requirement is met.

An additional requirement of being able to complete the MSW Program is the production of a current (within 30 days) criminal background check for Foundation and Concentration Practicum. Providing the background check does not guarantee acceptance into a Practicum setting or eligibility to sit for licensure. Students applying to this program should be aware of the potential ramifications of a positive criminal background check and the potential of not being

Degree Requirements

Foundation Curriculum

The foundation curriculum allows students to develop the foundation level competencies named above. This includes a minimum of thirty (30) semester hours of required study. The foundation practicum (6 semester hours) requires a minimum of 400 contact hours in the field.

Concentration Curriculum (30 Semester Hours)

The concentration curriculum allows students to develop competencies associated with either Direct Practice (DP) or Organizational Leadership and Management (ORGM). This includes a minimum of thirty (30) credits of required study. The Concentration Practicum is 9 semester hours requiring a minimum of 500 clock hours in the field.

Training Programs by the Commission on Accreditation of Athletic Training Education (CAATE).

Students are provided with a range of education experiences within the classroom, laboratory, and clinical environments to accomplish these objectives. Students are evaluated on their progress in meeting the above objectives through the program. Opportunities and evaluations are provided for actual participation in various athletic training settings such as secondary school, collegiate, professional sports, industrial, performing arts, and many others.

Expected Program Goals:

The MSAT Program aims to provide an evidence-based, comprehensive curriculum, with an emphasis on interdisciplinary and inter-professional collaboration that prepares the athletic training student to

1. Prepare students to practice athletic training through the preparation and passing of the Board of Certification examination.
2. Produce graduates that will be able to use patient values and circumstances, research findings, outcomes, and clinical expertise to guide clinical decision-making.
3. Produce graduates that will recognize the role of the athletic trainer as a healthcare provider within a larger context of a context of a changing healthcare system.

Expected Student Outcomes:

Upon successful completion of the MSAT Program, students will be able to

1. Demonstrate the knowledge to recognize, assess and treat the acute injuries and illnesses of physically active individuals and to provide appropriate medical referral.
 2. Demonstrate the knowledge to design, implement, document, and evaluate the use of various therapeutic treatment and rehabilitative methods in the treatment of injuries and illnesses in the physically active population.
 3. Demonstrate the knowledge to recognize, assess and treat the acute injuries and illnesses of physically active individuals and to provide appropriate the

the MSAT program and be allowed to hold a seat by the beginning of May.

Unconditional Admission

1. Applicants must have baccalaureate degree from a regionally accredited four-year institution. Students with a baccalaureate degree from an unaccredited or otherwise accredited institution should see Unaccredited or Otherwise Accredited Student Admission. Applicants who have attended a college/university outside of the United State must also provide a course-by-course credential evaluation with GPA calculation.
2. Applicants must have an overall grade point average of minimum 3.0 on a four-point scale;
3. Recommended score of 290 or higher on the Graduate Record Examination (850 on the old exam) (verbal and quantitative). Each student packet will be evaluated as a whole regardless of standardized exam results.
4. Completed application including all documentation & essay;
5. Official transcript from each college/university attended received;
6. Three (3) completed forms of recommendation received;
7. Submitted proof of Basic Life Support for the Healthcare Provider CPR certification;
8. Submitted documentation of completion of a minimum of 100 observation hours with an Athletic Trainer (BOC certified) in a high school, collegiate, clinical, and/or professional sports setting received;
9. Program interview.

International applications, American citizens or permanent residents who learned English as a second language must score at least a 575 (paper) or a 90 (internet) on the Test of English as a Foreign Language (TOFL) or a score of a 6.5 on IELTS.

Conditional Admission

Conditional Admission does not apply to this program.

Transfer Credit

A maximum of six semester hours taken at another regionally accredited institution of higher education with a “B” grade or better may be applied toward the degree. These courses must be comparable to Troy University courses and must be reviewed by the graduate athletic training faculty adviser who will make a recommendation to the Department Chair then the Dean of the College of Health and Human Services and the Graduate Dean. For students completing the Master of Science in Athletic Training, all transfer credits used to satisfy degree requirements may not exceed five years at the time of the course completion.

Degree Requirements

A student completing the coursework with a 3.0 or better GPA, fulfilling candidacy requirements, and successfully completing the required capstone requirement will be awarded the degree.

Additional Program Costs

Current expenses for tuition fees and other university fees are listed on the Troy University website. Students are also expected to pay for the following: appropriate clinical attire, transportation costs, annual background checks, annual drug tests, and semester TB skin tests.

Independent Learning

All students in the Master of Science in Athletic Training program are required to engage in independent learning, a process in which individuals take the initiative, with or without the help of others, to attain knowledge, skills, and professional behaviors. Activities such as case studies, critical analysis of literature, research/capstone projects, and clinical practica provide important independent learning experiences that give students ample opportunity to demonstrate and develop independent learning skills.

Curriculum

The MSAT degree program is a two-year full-time professional master's program requiring 57 credit hours beyond the bachelor's degree. The courses are taken in a prescribed sequence over 6 semesters, including 8 credit hours of clinical practice. Clinical practice occurs under the direct supervision of a certified and licensed athletic trainer.
